

# Ohlone Culture

## at Tule Ponds

**FREE FAMILY FUN**

**APRIL 4, 2020**

**11-4 PM**

The early Ohlone people lived in this area. There was abundant food to feed their people. Fertile land, California Live Oak, birds, mammals, and abundant water. Tule Ponds has been restored to the time when the Ohlone people would have roamed the area. Learn what they ate, how they built homes and boats, and how they played.

- Displays on Native American artifacts.
- Learn how to they ground acorns.
  - Make a tule doll.
  - Make an elderberry necklace.
- Displays on tules, silkworms, and more.

Please come join us. Our facility will be open to the public to walk around and see the many changes that are occurring on the site. Look at displays of the native animals and enjoy a few hours going back when nature was our only entertainment. Please remember no bikes, strollers, or pets. Please pre-register so all you need to do is check in when you arrive. Feel free to walk around or join one of our hour guided tours (every half hour).
