

INTERN OPPORTUNITY

Wetland Restoration Program (Application)

This is a chance to truly get involved and create a positive change to your own environment. There are two parts to this program. First you will receive training on how to facilitate environmental projects, everything from using tools to how to gather volunteers and choosing a project and planning its completion. You must be organized, reliable and willing to work with other people to accomplish a common goal. Ideally we would like 2 students per chosen school to work as a team.

Name: _____ Grade: _____

School: _____

Address: _____

Phone: _____ Email _____

Write in the area below why you are interested in helping the environment.

Past restoration efforts/service projects (coastal cleanup, creek cleanups, litter removal, etc.):

What extracurricular activities are you currently involved with? (such as sports, clubs, etc.)

References (2) (one must be a teacher) Please provide name, school or how you know this person, phone or email.
